Great Pacific Gold Announces Results of Annual General Meeting

June 17, 2026 – Vancouver, BC, Canada – Great Pacific Gold Corp. ("Great Pacific Gold" or the "Company") (TSXV: GPAC | OTCQX: GPGCF | Germany: 0B3) is pleased to announce the results of the Company's annual general meeting (the "Annual General Meeting") held on June 17, 2026. At the Annual General Meeting, shareholders approved all motions put forth, including the re-election of Gregory McCunn, Robert McMorran, Charles Hethey and Christopher Muller, and the election of Alex Heath to the Board of Directors. The shareholders also approved the appointment of BDO Canada LLP as the auditors of the Company, the 10% rolling stock option plan and the fixed equity incentive compensation plan.

Additional details of the above noted matters are set forth in the Company's information circular dated May 14, 2026, which is filed under the Company's SEDAR+ profile.

On behalf of Great Pacific Gold:
Greg McCunn
Chief Executive Officer and Director

About Great Pacific Gold

Great Pacific Gold's vision is to become the leading gold-copper development company in Papua New Guinea ("PNG"). The Company has a portfolio of exploration-stage projects in PNG, as follows:

- **Wild Dog Project:** the Company's flagship project is located in the East New Britain Province of PNG. The project consists of a large-scale epithermal target, the Wild Dog structural corridor, stretching 15 km in strike length, with geophysical data suggesting significant depth extent. The survey also highlighted the Magiabe porphyry target, adjacent to the epithermal target and potentially 1,000 metres in diameter and over 2,000 metres deep. Drilling of the epithermal structure on the Sinivit target has yielded high-grade results, including WDG-08 which intercepted 8.4 metres at 50 g/t AuEq from 154 metres. The current drilling program will extend into 2026 with the second drill rig now operational.
- **Kesar Project:** located in the Eastern Highlands Province of PNG and contiguous with the mine tenements of K92 Mining Inc. ("K92"), the Kesar Project is a greenfield exploration project with several high-priority targets in close proximity to the property boundary with K92. Multiple epithermal veins at Kesar are on strike and have the same orientation as key K92 deposits, such as Kora. Exploration work to date by the Company at the Kesar Project has shown that these veins have high grades of gold present in outcrop and very elevated gold in soil grades, coincident with aeromagnetic highs. The Company conducted a diamond drill program on key target areas at the

Kesar Project from November 2024 to May 2025 and have developed a follow-up Phase 2 program for 2026.

- **Arau Project:** also located in the Eastern Highlands Province of PNG, the Arau Project is south of and contiguous to the mine tenements of K92. Arau contains the highly prospective Mt. Victor exploration target with potential for a high sulphidation epithermal gold-base metal deposit. A Phase 1 Reverse Circulation drilling program was completed at Mt. Victor in August 2024, with encouraging results. The Arau Project includes the Elandora licence, which also contains various epithermal and copper-gold porphyry targets.

The Company also holds the Tinga Valley Project in PNG.

Forward-Looking Statements

Information set forth in this news release contains forward-looking statements that are based on assumptions as of the date of this news release. These statements reflect management's current estimates, beliefs, intentions and expectations. They are not guarantees of future performance. Great Pacific Gold cautions that all forward-looking statements are inherently uncertain and that actual performance may be affected by many material factors, most of which are beyond their respective control. Such factors include, among other things: risks and uncertainties relating to Great Pacific Gold's limited operating history, its future financial or operating performance, its exploration and development activities on its mineral properties, costs and timing of future exploration and the need to comply with environmental and governmental regulations. Accordingly, actual and future events, conditions and results may differ materially from the estimates, beliefs, intentions and expectations expressed or implied in the forward-looking information. Except as required under applicable securities legislation, Great Pacific Gold does not undertake to publicly update or revise forward-looking information.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
